Flu viruses. They're lurking on your hands, keyboard, doorknobs, vending machine buttons and even in the air when you talk to someone. The virus is everywhere. You can catch it and spread its nasty fingerprints even before you know you've got it. And if you get the flu? Well, you can count on up to two weeks of aches, pains, chills and misery. Get the shot. It only takes 15 seconds.

Get the shot. Not the flu.
